

MESS - Mass loss of Evolved StarS

Initial Results

Martin Groenewegen
marting@oma.be

on behalf of the MESS consortium

MESS

This GT KP aims at studying the circumstellar matter in evolved objects

- AGB, Post-AGB, PNe, RSG, WR, LBV, SN
 - Photometric mapping of nearby objects
 - Spectroscopy of nearby objects
 - SPIRE and PACS
- Mass-loss dominates the evolution
How? How much? Time evolution? Spherical?
Production of dust

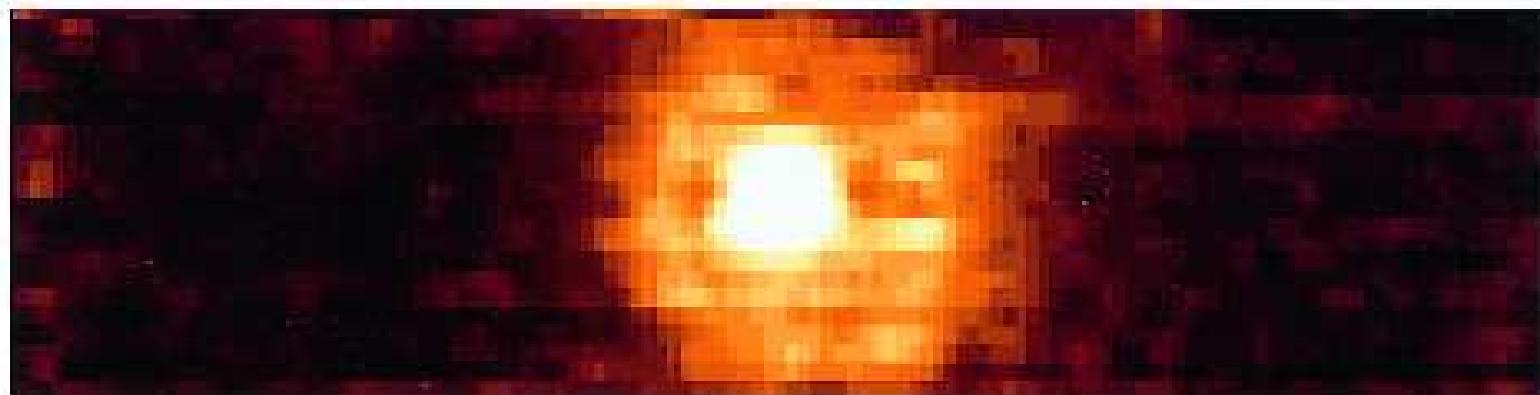

Fig. 1. 90 μm image of Y CVn taken with PHT-C100 array detector and C90 filter displayed in linear brightness scale.

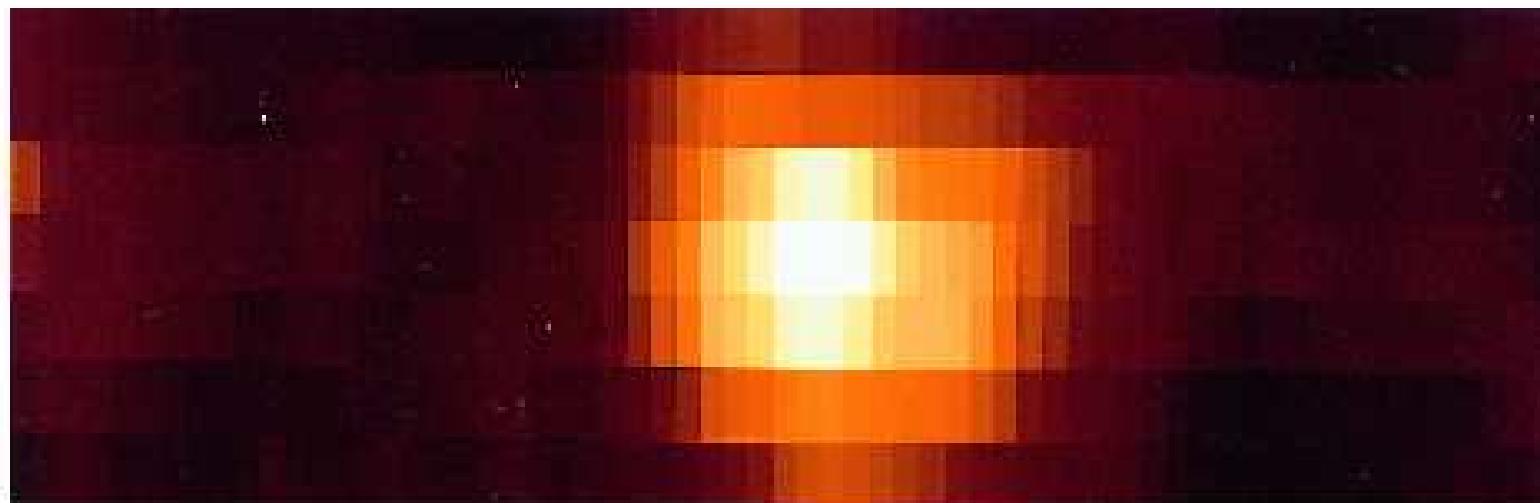

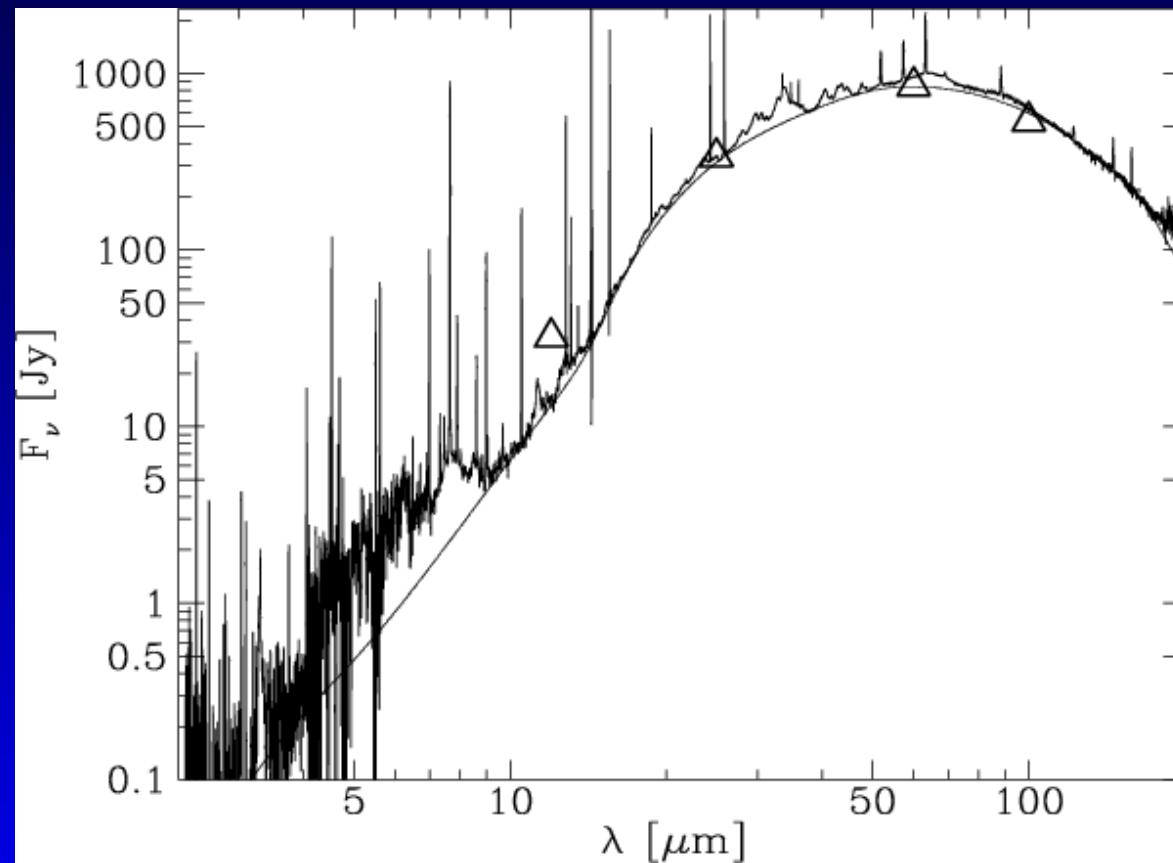

Fig. 2. 160 μm image of Y CVn taken with PHT-C200 array detector and C160 filter displayed in linear brightness scale.

Y CVn
Izumiura et al. (1996), 8' \times 35' ISOPHOT map

Spectroscopy of nearby objects

Goal: Study of
dust properties, molecular lines, emission lines

NGC 6302; Molster et al., SWS + LWS spectrum

Partners involved

Partner	“origin”	hours	special interest
Belgium	PACS GT	145	KUL (AGB, post-AGB, PN, WR, LBV) ROB (AGB, PN) ULB (binary AGB) IAGL (WR, LBV)
Vienna	PACS GT	47	AGB
Heidelberg	PACS GT	10	SN remnants
SAG 6	SPIRE GT	80	SN, AGB, post-AGB, PN
HSC	HSC	26	special type of post-AGB
MS	MS	5	Molecules in specific stars
<hr/>			
313			

Implementation (Photo)

PACS:

“Scan Maps” at $70 + 160 \mu\text{m}$

78 AGB/RSG, 16 post-AGB/PN, 8 WR/LBV, 5 SN

OBSERVED: 56

SPIRE:

“Large maps” at $250, 350, 500 \mu\text{m}$

26 AGB/RSG, 8 post-AGB/PN, 5 SN

ALL but 4 OBSERVED

Implementation (Spectro)

PACS:

Concatenation of two AORs to cover entire
60-210 μ m region

Spatial information: 5×5 pixels = $47'' \times 47''$

27 AGB/RSG, 26 post-AGB/PN, 2 WR/LBV, 4 SN

OBSERVED: 3 PV/SDP

SPIRE:

Full FTS scans

9 AGB/RSG, 10 post-AGB/PN, 2 WR/LBV, 1 SN

ALL but 3 OBSERVED

Interaction ISM

Jorissen, Kerschbaum, Van Eck, et al. (in prep.)

Models

Wareing et al.
(2007)

Conclusions

- Detected "old" dust mass loss in AGB stars !
- Interaction with the ISM is common
- Issues
 - Faint extended emission
PhotProject/NaiveMapper versus MADMap
 - Dust emission close to the star
PSF subtraction / deconvolution
