The Formation of Stars and Planetary Systems, 2010, September 6-9, Särö, Sweden

Section & Talk by V. de Geers

Name/Question A. Sargent

Are there data available for similar variable stars that you could investigate?

Name/Answer V. GEERS

Yes. We checked in the Spitzer Archive for variable stars with multi-epoch spectra. We found at least 4, of which at least two have spectra taken <sup>(both)</sup> during outburst and post-outburst, where a significant change in luminosity was observed, and we are ~~start~~ investigating them currently.
