The Formation of Stars and Planetary Systems, 2010, September 6-9, Särö, Sweden

Section & Talk by A. Krivov

Name/Question..... M. Wyatt

A comment: You discussed how low levels of stirring, as envisioned by Thebaud & Wu, could not explain the cold disks which are, however, explained by black body spectrum glow. In fact, ^{even} lower levels of stirring, as in the models of Kerg & Teyssie, predict a black body spectrum.

Name/Answer..... A. Krivov

I agree - this could be a possibility!
